

THE STOP

On-course convenience.

More opportunities
for your club.

Bespoke self-service vending
buildings for golf clubs

Better Facilities, Better Golf, More revenue opportunities.

A useful stop. An opportunity to sell.

Convenience for golfers. Potential income for clubs.

The Stop gives members and visitors access to refreshments and useful golf essentials during their round, creating opportunities for sales beyond the clubhouse.

Designed for self-service use, it can suit a busy tee, a natural stopping point or a practice area. Location and product choice are tailored to your club.

No dedicated counter attendant is needed during use. Your club or vending partner still manages stock, cleaning, maintenance and customer support.

The Stop — one machine

A compact footprint. A simple starting point.

A single combination machine brings drinks and snacks together in a smaller building, suited to limited space or an initial on-course vending offer.

The recessed opening and generous roof overhang add shelter, while a roller shutter closes across the machine when it is out of use.

The building is designed around the selected machine, including installation clearances, servicing and replenishment access.

The Stop — two machines

Separate drinks and snacks. A broader choice.

A two-machine layout allows dedicated drinks and snack cabinets, giving your club more flexibility over product ranges and stock capacity.

Contactless payment can make purchases straightforward during the round, with compatible equipment selected to suit your operating arrangements.

A sheltered recess, coordinated lighting and a full-width roller shutter are incorporated into the concept. Club branding can personalise the frontage.

The Stop — three machines

Refreshments and essentials. Together on the course.

Cold drinks: water, soft drinks and sports drinks in a dedicated cabinet.

Snacks: crisps, chocolate, cereal bars, nuts and other packaged choices.

Golf essentials: gloves, hats, balls, tees and suncream. Machine suitability and packaging are checked for the chosen range.

Three separate cabinets create more selling opportunities within one coordinated building.

Choose the finish. Choose the roof.

Natural timber

Timber with stone base

Charcoal composite

A design that belongs on your course.

Choose a apex roof design, with natural timber, a stone base or composite cladding. Colours, signage and details can complement your club. These examples illustrate possible finishes; the final materials and specification are agreed in your quotation.

Choose the finish. Choose the roof.

Natural timber

Timber with stone base

Charcoal composite

A design that belongs on your course.

Choose a pent roof design, with natural timber, a stone base or composite cladding. Colours, signage and details can complement your club. These examples illustrate possible finishes; the final materials and specification are agreed in your quotation.

Full installation packages available.

From foundations to the finishing touches, we provide a complete installation designed around your club.

Your package can include a bespoke **one-, two- or three-machine building**, security shutter, lighting, club branding and installation, complemented by **benches, bins, directional signage and a branded sponsor board**.

We can accommodate your existing vending machines or arrange equipment supply as part of your quotation. An optional annual building maintenance package helps keep The Stop looking its best.

One coordinated package. Built around your course.

Your quotation will clearly confirm the building, equipment, accessories and installation work included.

Shelter, security and everyday use

**Designed around the site.
Planned around the
equipment.**

A deep vending recess and extended canopy add weather shelter. The raised shutter allows access during use and closes over the machines afterwards.

Machine suitability, ventilation and servicing access are checked with the equipment supplier. Power, payment connectivity, drainage and base preparation are assessed for your site.

Agree responsibility for restocking, pricing, shutter operation and maintenance. Returns depend on footfall, margins and running costs.

Let's plan The Stop for your club.

Your course. Your products. Your identity.

Send us photographs of the proposed location, approximate available space and your preferred machine layout. An indicative budget and details of nearby services help us suggest a suitable starting point.
